

# Riesling

## White clover (medium-large leaf)

- Medium-large leaf
- High production
- Maintains high clover content in pastures
- Excellent grazing tolerance and persistence
- Suited to wide range of animal types

## Ratings

Riesling is our most successful white clover. It has a medium-larger leaf size and high stolon density combined with excellent production.

Riesling has impressed farmers with its vigour and its ability to maintain high clover content in pastures, under a wide range of farm types.

Riesling can be used as the sole white clover cultivar under sheep and beef grazing, or combined with Klondike for dairy pastures.
